PERSONAL STATEMENT

Reliable team worker and problem solver with a solid and reliable background in Statistic and Data Science, able to turn challenges into opportunities to reach targets. A proactive learner with excellent communication skills, well versed in Machine Learning, Cloud Computing and Generative AI modelling. Committed to upholding social ethics, transparency, data integrity, security, and privacy principles throughout the entire engineering process. Passionate about leveraging data insights for decision making and business performance. Endowed with exceptional customer service skills and eager to assist experienced data management professionals and continually upgrade my abilities in those sectors. Perfectly fluent in English and French.

TECHNICAL SKILLS

Programming Languages: JAVA, IntelliJ IDEA JDK, Javascript, Python3, C++, HTML5, CSS, Postgres, SQL, R, SPSS, Pytest, Keras, Tensorflow, Pandas, Flask, Tableau, Matplotlib, Excel.

Cloud Computing/Deployment/Automation: Terraform, Makefile, FastAPI, Servers, Github Actions, Amazon Web Services including S3, EC2 and EC3, AWS Lambda, IAM, Cloudwatch, Athena, Boto3, Moto.

Testing: Test Driven Development, Object Oriented Programming, Debugging/Testing, Error Handling.

Data: Generative AI (*IBM Badge*), IBM Watson x, Data Bricks, Large Language Models, Deep Learning.

Design Patterns: AI Prompt modelling, Neural Networks tuning, Relational Databases, CI/CD integrated pipelines.

Methodology: Agile/Scrum, Trello for team projects, Pair-Programming with rigorous critical thinking.

EXPERIENCE

Generative AI Engineering – Fundamentals of Generative AI , February 2026 to now

- **IBM**, Badge and Certifications Program.
- Built a AI prompt neural network with IBM Watsonx Services.
- Optimised key tuning parameters to avoid unprivileged groups occurring during the training process.
- Ensured transparency and robustness of Large Language Models against adverse inputs.

Software Development – , February 2026

- **Code Academy** , JAVA Core Course
- Built robust interfaces for interactive prompts between backend modules and frontend users.
- Implemented JAVA threading methods to orchestrate concurrent tasks and optimise workflows.
- Tested software functionalities with JUnit 5 for a rigorous and smoother error handling.

Data Engineering / Devops – Cloud Computing / AWS Lambda, From September 2025 to October 2025

- **Tech Returners**, UK GDPR Obfuscator Project (**Freelancer**)
- Built and deployed an automated Data Obfuscator for sensitive information under UK GDPR requirements.
- Wrote Terraform scripts for remote deployment of resources on AWS platform.
- Tested Software units and security vulnerability thoroughly to assess robustness and ensure safe deployment.

Web Development – Skills and Employability Program, From July 2025 to August 2025

- **Maximus Restart Program**, Greenwich Job Centre.
- Designed and deployed a portfolio website currently through Continuous Integrated Development.

- Continuously working on frontend frameworks with Flask to deploy and present backend projects.

Data Science – Fundamentals of Neural Networks for Deep Learning, From April 2024 to June 2025

- **Upgrad** Data Science Course
- Neural network modelling and hyper-parameters optimisation.
- Built a neural backend with Keras and Tensorflow for batch processing, training and prediction.

Data Engineering – Data Engineering training course, From January 2024 to March 2025

- **Northcoders** Data Engineering Bootcamp Graduate (Javascript, Python, Pytest, Git, Linux, Ubuntu, Cloud Computing, PostgreSQL, FastAPI, Amazon Web Services, Boto3).
- Built an automated ETL application for real-time data ingestion/processing/storage with integrated Cloudwatch logs monitoring and alerts with AWS Lambda, Makefile and Terraform.
- Certified in Python Essentials and Collaborative Git for version control (**AICore**, August 2024).
- Certified in Linear Regression for Machine Learning (**Pairview** Ltd, July 2024).

Website Design – ASCA Project, From January 2022 to December 2023

- Built secure websites using HTML5, CSS, and JavaScript in test-driven environments.
- Setup CSS and Javascript frameworks for 3D animations and responsive design that improved loading time by 50%.
- Tested and deployed automated and secure API endpoints optimised for mobile phone display.

Volunteer – Greenwich Volunteering Centre, From September 2015 to January 2016

- Assisted at big sport events across South-East London for successful solutions and initiatives.
- Team supervisor assistant in marshalling activities and other operative duties across Greenwich.

Retail Support Assistant – OCS Group, From February 2014 to September 2015

- Stocktaking and merchandising for business-to-business inventory agencies across London and South-East England.
- Cataloguing of retail products with wireless data management systems for performance analysis.

Research and Marketing consultant – KOSIA Consulting, from April 2013 to August 2013

- Auditing on resources, market needs and sales strategies, market survey, analysis and reports.
- Successfully carried out negotiations with prospective clients to rebuild brand awareness and recognition.

Information officer – Chart-Mining / We-are-Cameroon, from September 2011 to September 2013

- In charge of the Graphic Research Department, and the sourcing of relevant databases.
- Data Mining and Data Entry, Cataloguing and Indexing digital materials copyrighting processes.

Statistician – MINEPAT Cameroon, from October 2007 to February 2011

- Calibration and critical evaluation of several macroeconomic diversification index at the BEAC.
- National Household Surveys and Data Analysis, Collection, Storage, Analysis, Reporting .

Machine Learning / Data Science – Personal project, From January 2020 to December 2021

- Neural Network Programming with Python applied to AI using training models and test models.
- Optimal Research for AI applications, visualisation with Mathplotlib, Tableau and PowerBI.

Sound Recording & Engineering – From January 2016 to December 2019

- Music book on jazz theory published on Smashwords e-stores.
- Recording, Editing, Gain-Staging, Mixing on digital platforms and social media.

EDUCATION AND QUALIFICATIONS

MSc in Marketing – Heriot-Watt University (2013-2015)

Master of Business Administration (Finance Management) – of Wales (2011-2013)

MSc in Engineering Statistics (Applied Statistics and Economics) – ISSEA-CEMAC (2003-2007)
Baccalaureate in Maths and Physical Sciences – Yaounde, Cameroon (2001-2002)

INTERESTS

Data Science, Big Data interfaces, front-end/ back-end Web Development for business ideas.

Using Statistical and probabilistic models to manage big and complex data loads.

Other interests: Arts as medium for education, Martial Arts, discovering other cities.
